

caring for KIDS

More children die of injury than die of cancer, asthma and infectious diseases combined*.

The majority of accidents happen in and around the home. Having the first aid skills and confidence in these situations could save a child's life.

Course description:

St John 'Caring for Kids' is a comprehensive yet simple first aid training course suitable for parents, guardians and/or carers of young children up to the age of 12. This course provides the knowledge and skills to manage everyday emergency situations.

Caring for Kids course content:

- Management of medical emergencies for children
- Management of an incident and assessment of casualty
- Provide infant and child Cardio Pulmonary Resuscitation (CPR)
- Management of wounds, bleeding, burns and fractures
- Management of poisons, bites and stings
- Acute illness in infants and children

Classes: Conducted at most St John training venues or onsite as agreed.
